

COMPANY PROFILE

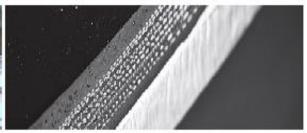

- Creation in 1978: More than 40 years designing, manufacturing and installing expansion joints, flexible connections for piping and ducting systems.
- Serving any type of heavy industry with our wide range of FABRIC, METAL and RUBBER EXPANSION JOINTS (coal, gas, biomass fired power plants, hydro power plants, water desalination plants, cement plants, steel plants, chemical and petrochemical plants, sugar plants) ...

SEIRIS works in close collaboration with the most famous EPC companies (Engineering Procurement Construction), OEMs (Original Equipment Manufacturers), End Users.

- Operating internationally, we are present in Europe, USA, Central America, Middle East North Africa (MENA), India and South East Asia. Our expansion joints are installed worldwide!
- Our Clients from these very different industries are our most valuable R&D experts. With their help we keep on developing the most suitable solutions for the most different and critical applications.

- Production facilities in Paris (France), Sousse (Tunisia), Monterrey (Mexico), Ho Chi Mihn (Vietnam), Hyderabad (India), Izmir (Turkey).
- Tailor Made fabrications according to Dimensions, Shapes and Operating Conditions of our client's most critical applications.
- Manufacturing and testing our products according to internationally recognized standards (E.S.A, F.S.A, E.J.M.A, ASME, AD MERKBLATTER, ASTM, ABS...)
- More than simple products, SEIRIS is offering turnkey solutions from the design to the installation of these expansion joints :
- Inspection
- On site measurements
- Expansion joints inventory
- Installation Supervision
- Installation
- Training
- Seminars...

Our Team is ready to serve you any time!

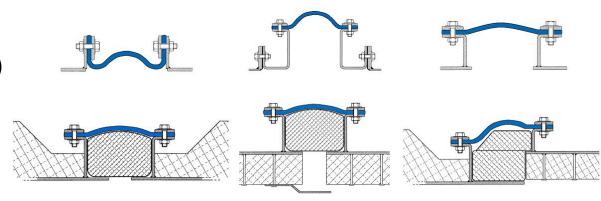

FABRIC EXPANSION JOINTS

- Single Layer or Multiple Layers
- U-Type or Belt Type configuration
- With or without Bolster (insulation)
- With or without steel frame
- Materials : Technical textiles

Temperature : up to 1 200 $^{\circ}\text{C}$

Pressure: up to 0,25 bar

FABRIC EXPANSION JOINTS

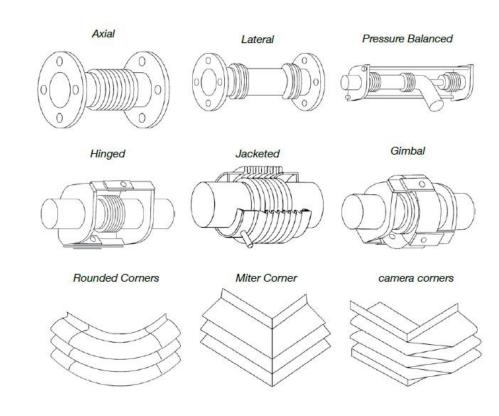

METALLIC EXPANSION JOINTS

- Single ply or Multiple plies
- Single convolution or Multiple convolutions
- To be welded or flanged Type configuration
- Materials : Carbon steels, Austenitic stainless steels, Nickel Alloys ...

Temperature : up to 1 200 °C

Pressure: up to 120 bars

METALLIC EXPANSION JOINTS

RUBBER EXPANSION JOINTS

- Single ply or Multiple plies
- Single convolution or Multiple convolutions
- Swivel or Integrated flanges Type configuration
- Materials : Wide range of rubbers

Temperature: up to 200 °C

Pressure: up to 25 bars

RUBBER EXPANSION JOINTS
